

OBJECTIVE

To obtain a Java Full Stack Developer position where I can leverage my skills in Java, Spring Boot, React.js, SQL, and related tools to build high-quality applications. Seeking an opportunity to contribute to innovative projects, enhance my technical expertise in both frontend and backend development, and support organizational growth while advancing my career.

Technical Skills

- Languages: JAVA, SQL, HTML, CSS, JavaScript.
- Tools: MySQL Workbench, Postman, VS Code
- Frameworks: Spring Boot, Spring Data JPA, React.js
- Interest: Java Full Stack Development, Web Application Development, Backend API Development, Frontend UI Development

WORK EXPERIENCE

Play with Bot: Java Intern

03/2022 – 10/2022

- Gained hands-on experience in **Java programming** through real-world coding tasks.
- Contributed to the development of a **Nest School web application** to facilitate online learning for students during lockdown.
- Implemented core Java features to manage user interactions, learning modules, and assessment functionalities.

EDUCATION

Meenakshi Sundararajan Engineering College

2020 – 2024

B. E. COMPUTER SCIENCE AND ENGINEERING -

CGPA - 8.11

CERTIFICATIONS

Full Stack Development

Feb 2023- Mar. 2023

* Full stack development certifications provide comprehensive training in both front-end and back-end technologies, equipping professionals with the skills needed to design, develop, and deploy complete web applications.

Java Full Stack Development

Aug 2024- Jan. 2025

* Java Full Stack course provides comprehensive training in both front-end and back-end development using Java technologies. It covers core concepts like Java programming, Spring Boot, and REST APIs for backend development. On the front end, you'll learn HTML, CSS, JavaScript, and frameworks like Angular or React. The course often includes database management with SQL and tools like Git for version control.

PROJECTS

Online Products Buying Application

- Built a **React.js**-based e-commerce platform for products like clothing, watches, mobiles, and accessories.
- Integrated APIs for real-time data and designed a responsive, user-friendly interface.

Loan Management Module – Spring Boot & Postman

- Built a Spring Boot app with MySQL to handle loan applications, updates, deletions, repayments, and status checks. Developed and tested APIs in Postman, including a custom query for transactions within a given amount range.
